I would say it was ok working with Dane on this project. He was very helpful in class to get the assignment completed but didn't do as much outside of class. His communication was great in class, but I only received a couple of emails asking about the assignment and other details. He was very good at solving some of the problems we had including the do/while loop that I had messed up. Along with that he was very flexible on any changes that were made to the code itself. During the process he had a positive attitude even when the program wasn't running correctly.
